

SNOW PLAN 2016-17

OFFICE OF RESEARCH FACILITIES DEPARTMENT OF FACILITIES OPERATIONS AND MAINTENANCE

‘SNOW DOES NOT STOP SCIENCE’

NIH, ORF, and DFOM are thoroughly equipped to ensure that snow does not stop science. Consistent with tier-designations, non-emergency staff are encouraged to use flexibilities to remain off the roads and away from NIH campus to aid in the clean-up. Please be mindful of heavy snow removal equipment and low visibility. If you need individual assistance, please call the ORF Help Desk at (301)-435-8000.

Check employees.nih.gov or OPM.gov to determine the opening status of NIH. NIH will prioritize key areas of campus for snow removal. Under Priority I, roads and walkways for patient and animal care facilities will be continuously passable.

Priority I Employee Entrances and Parking -

Vehicle Entrances: MD-355 and South Dr; MD-355 and Wilson Dr; West Cedar Ln and West Dr; Old Georgetown Rd and Center Dr

Pedestrian Entrances: West Cedar Ln and North Dr; Old Georgetown Rd and Center Dr

Parking: Multi-Level Parking Garage 8, 9, & 10

NIH will enter Priority II once the weather subsides. Priority II includes all remaining areas of campus.

Here is a viewing of what is happening outside of campus:
